EXAMINER'S AMENDMENT

The application has been amended as follows:

Claim 20, line 1; "track system" has been changed to --weight support apparatus--.

The above amendment has been made to correct an obvious typographical error.

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawing figures are too dark thus obfuscating the details thereof. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest "track means extending outward from said vest and around the operator ... allowing for said mounting end of said support arm to slideably rotate along said track means in moving relation to said operator" in combination with the remaining claim elements as set forth in claims 1-12 .

The prior art does not disclose or suggest "track means extending outward from said vest and around said operator ... allowing for said second end of said support arm to slideably rotate along said track means in moving relation to said operator" in combination with the remaining claim elements as set forth in claims 13-20 .
